

Authors: Yash Anand, Mark Gouzoulis, Linfred Kingston, Jander Kugelman, Jonathan Li, Duy Pham, Eashan Siddalingaiah, William Taylor, George Witt **Mentor:** Mohammed Hafezi || **Librarian:** Jordan Sly

Acknowledgments: We'd like to extend a big thank you to our Gemstone program leaders, Dr. Lansverk, our mentor Dr. Hafezi and Librarian Jordan Sly. This project would not be possible without them!

Towards Extending Ising Model Coherence Times with Deep Recurrent ASO Neural Networks

	Overcome Issues:
M	- Improved models by generating full
C	information simulated data
	- Previous work was less accurate for
	small scale systems, improved with
	RNNs
)	- New work shows more lower MSE
	predictions after hyperparameter
	tuning
